Materials

Our cable strap is made from high-quality, durable plastic material. This material is resistant to moisture, UV radiation, and most chemicals, ensuring a long-lasting and reliable cable management solution.

Applications

The cable strap is suitable for securing and organizing various types of cables, including:

* Communication and network cables

* Power cables

* Audio and video cables

* Control cables

It can be used in a wide range of industries and environments, such as:

* Marine

* Data centers

* Telecommunications

* Power&Process Industries

Installation Instructions

1. Measure the desired cable length and select the appropriate cable strap length from the available options (200-1000 mm).

2. Loop the cable strap around the bundle of cables, ensuring it is centered and evenly distributed.

3. Pass the cable strap's ends through the provided slots on the clip.

4. Fasten the clip securely to tighten the cable strap around the cables, holding them in place.

5. Trim any excess strap material, if necessary, using scissors or a utility knife.

Safety and Compliance

Our cable strap is designed to meet general safety requirements for cable management. Please ensure proper installation and usage to avoid any potential hazards or damage to the cables or equipment.
